

GOLD FOR KIDS

Welcome pack

HELPING CHILDREN THRIVE

www.goldforkids.org

Thank you for agreeing to be part of Gold for Kids.

In this Welcome Pack:

- **How the Project Works**
- **Collection process for your sterilisation area to help staff with collection**
- **A printable 2 page flyer for you to share with your patients**

For more information please check out our website at www.goldforkids.org, contact us on info@goldforkids.org, call us on **0207 563 9989**.

We look forward to hearing from you.

With best wishes,

The Gold for Kids Team,

Donation Process

Crown Collection

After removing a precious crown (not deemed clinical waste) the clinician should inform the patient of its potential value*. This is the ideal moment to introduce the option of donating it to Golf for Kids.

Storage

The tooth/crown should be scrubbed, sterilised and stored in a plastic container. Once the container is nearly full, or every quarter or so, email us to arrange a prepaid envelope. Then, simply send to us!

Donation/Solidary Certificate

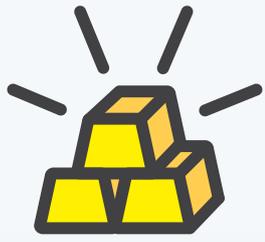

On receipt of the donation, Gold for Kids will register the weight and once the Melt and Assay has been performed the precious metals will be sold at market value. The clinic will then receive a certificate detailing the value of their contribution.

Nominated Charities

Depending on the amount raised, the trustees will assess the applications and nominate one or two charities, who will receive the funds on an annual or bi-annual basis.

*Best practice according to GDC and CQC.

GOLD FOR KIDS

Wouldn't you like to make a difference
for children in need all year round -
simply, easily, effectively, transparently?

HELPING CHILDREN THRIVE

www.goldforkids.org

Across the country, millions of pounds of potential income for children's charities is lost every year. At a time when the demand for services is higher than ever, many of these organisations, and the children they serve, are under threat.

Many Dental professionals are unaware of the huge potential that the combined value of removed restorations represents. We believe patients, professionals and the public are united in the belief that this money is best used for the greater good - to help the many children's charities across the country in their vital work.

That's why we make it possible for value driven dental practice to make a big difference - collecting and turning restorations into cash - which becomes income for children's charities.

Why Gold For Kids?

As dentists ourselves, we know that there is value in the restorations and metals we recover from patients. And traditionally, due to the relatively low value of a single restoration, that value was retained. But what if that value could be multiplied and used to benefit some of the most vulnerable children in the UK? What if we could turn a few hundred pounds into tens of thousands of pounds every year? This is why Gold For Kids was created.

Where does the money go?

Gold For Kids currently partners with Barnardos and NSPCC, with a view to expand our support to other children's charities as our partnerships grow. Currently resourced entirely by volunteers, our registered charity status means that in the future, the costs of operating the charity will be covered by the gift aid recovered on donations. This means that the value of your donation is what is transferred to the charity.

How can you help?

Visit our website goldforkids.org and request a Welcome Pack. We'll send you everything you need to start collecting gold for kids and sharing your commitment with your patients.
